252 Well Incident

Fyi,

It appears we are getting better and more consistent info from our LNO participating in GOHSEP mtgs than through the RRT. Is this something we need to work on? I know you've sent out info, but is the USCG using the RRT?

Subject: Mississippi Canyon 252 Well Incident

Mr. Russell and Mr. Fairley,

A Unified Command Group Meeting was held today at approximately 1400 with a joint US Coast Guard – British Petroleum briefing.

Just before the briefing began an individual unknown to me stated to Governor Jindal that they want to ensure all information is considered for an Incident of National Significance.

Richard L. Morrison, Vice President, Gulf of Mexico Production for British Petroleum, briefed the Governor and staff. Approximately 1,000 gallons of oil are spilling per day. The spill now covers approximately 188 square miles of gulf waters. Several mitigating efforts are occurring simultaneously: 1) Two remotely operated underwater vehicles (ROVs) are focused on the blowout preventer, attempting to engage shutoff, 2) relief wells are being planned and will take approximately three months and 3) an oil containment system, cofferdam, is being assembled with a planned hook up in two weeks – this has never been done before in deep water. BP Morrison showed diagrams of the Blow Out Preventer in relation to the proposed relief well site. Captain Hanzalik, USCG Incident Management, stated that funds in the amount of \$6M per being expended in support of relief efforts. Everything that can be done is being done.

Governor Jindal stated that winds have shifted and the expectation is that this will be a coastal event beginning late Friday night or early Saturday morning. From a state agency response he asked to hear from Wildlife and Fisheries, Health and Hospitals, DEQ, Louisiana Oil Spill Coordinator's office, etc. The Governor asked how people will find out about closures. The website <http://www.emergency.la.gov/> will post information.

Wildlife and Fisheries

- Exploring possibilities for involving fishing industry in cleanup activities.
- Untrained workers can not handle wildlife.

Health and Hospitals

- Discussed how the oyster industry may be affected.
- Closing certain areas to recreational use and testing waters prior to reopening.
- Contamination of drinking water is not anticipated due to intakes located in Mississippi.

LOSCO

- Dr. Karolein Debusschere from the Louisiana Oil Spill Coordinator's Office (LOSCO) asked BP for a list of contractors working cleanup. BP Morrison indicated that he would provide her with the information.
- To the extent possible, Louisiana companies will be used and clean-up

contractors will team with local responders.

Governor Jindal asked if there is a role for the National Guard. Morrison indicated that they are bringing in experienced off-shore workers to lead clean-up teams that will work with responders and employ locals.

DEQ has 40 experienced regional staff on the ground. Others will be deployed.

Governor Jindal closed with comments about this event having significantly evolved since our meeting last Friday when the expectation was oil would not reach the coast. The state needs to assume that this will be a 90-day incident and keep in mind three things:

1. The cumulative impact on people, wildlife, fisheries, etc.
2. Next steps if flow increases dramatically.
3. This is a marathon event. We currently have in place a number of fixed assets and we can't wear them out. While BP is bringing a tremendous amount of resources to this respond, the state needs to identify the gaps to BP and the USCG.

Again, there was no discussion that involved FEMA.

Subject: UPDATE 12 - Deepwater Horizon
Update=

DATE: April 29, 2010 12:= 15:56 CST

UPDATE 12 - Deepwater Horizon Update

The unified command continues with a comprehensive oil well intervention and spill-response plan following the April 22 sinking of the Transocean Deepwater Horizon drilling rig 130 miles southeast of New Orleans. More than 1,000 personnel are involved in the response effort both on and offshore with additional resources being mobilized as needed.

The Minerals Management Service remains in contact with all oil and gas operators in the sheen area. Currently, no production has been curtailed as a result of the response effort.

Incident Facts:

A flyover on Wednesday, April 28 at 2:00 p.m. (CDT), continued to show a large, rainbow sheen with areas of emulsified crude, approximately 16 miles off the coast of Louisiana.

On April 28 at approximately 4:45 p.m. (CDT), the response team conducted a successful, controlled in-situ burn and is evaluating conducting additional burns.

More than 174,060 feet of boom (barrier) has been assigned to contain the spill. An additional 243,260 feet is available and 265,460 feet has been ordered.

To date, the oil spill response team has recovered 18,180 barrels (763,560 gallons) of an oil-water mix. Vessels are in place and continuing recovery operations.

76 response vessels are being used including skimmers, tugs, barges and recovery vessels.

98,361 gallons of dispersant have been deployed and an additional 75,000 gallons are available.

Five staging areas are in place and ready to protect sensitive shorelines. These areas include:

Biloxi, Miss., Pensacola, Fla. Venice, La., Pascagoula, Miss., and Theodore, Ala.

Weather conditions for April 29 - Winds from the southeast at 5-15 mph, choppy rough seas.

126 people were on the Deepwater Horizon drilling rig when the incident occurred. 11 remain unaccounted for; 17 were injured, 3 of them critically. 1 injured person remains in the hospital.

To report oiled or injured wildlife, please call 1-800-557-1401.

To discuss spill related damage claims, please call 1-800-440-0858.

To report oil on land, or for general Community and Volunteer Information, please call 1-866-448-5816.

RRT Activation for Oil Spill<= /table>

I have had a couple of requests from RRT members to find out about on-site activation of the RRT... There has been no discussion between the RRT Co-Chairs to convene the RRT on-scene.

If such a decision is reached by the RRT Co-Chairs, Bill Goetzee or I will send out that notification as soon as we are told of that decision.

Bill will send out an invitation for a RRT teleconference in the very near future.

Faithfully yours
Steve

Hi, Steve. I'm hearing rumblings from Response about possible RRT activities in relation to the oil spill. Can you enlighten me, please?

By the way, Kristen was VERY excited to see you in LA!
